

# Don't Eat Yellow Snow

**By Hannah Burson**  
Staff Writer

A new school year at Heard County High School is in session. With a new year, new students, and a new school comes new problems. As a senior, I have been through the many troubles that most of you are facing or will eventually face. My page this year will consist of me helping everyone get through the year as smoothly as possible.

First up, I'm going to try to help out the freshmen. Freshmen are always going to be hated by the upperclassmen. Everything a freshman does will always be aggravating to someone else. My advice is that you just have to deal with it. Everyone was a freshman sometime, but one day you will be at the top. As for right now and for this year, you just have to cope with it. I know it is going to be horrible, but the year will pass by faster than you think and by next year, you'll be making fun of the "fresh meat."

Secondly, do what you are told. It is never cool to think that you run the school and not

do what you are supposed to. Do what you have to do. Your high school experience will be so much easier and less painful if you just do it. Nobody likes to see people who are cocky and think that they can walk around and do whatever they want and not get in trouble for it. If you want to just ignore the system, then Curbow will enjoy having you attend a little thing we call ISS.

The third and final thing is to just enjoy your high school years. You cannot get them back. You are at the top of your prime right now, so just go through your days with a smile even if it is hard to. For me, I wish I had some of those days back and turn those bad days into the best days. It goes by faster than anyone will expect and pretty soon, you will be the one walking across that stage and saying your final good-byes. You can go through these halls looking at it from a positive or a negative outlook. As I said, my advice is to enjoy every moment and to never let something ruin your whole day. High school will most definitely have its ups and downs, but you have to make every moment count.
